Vertical Blinds

Vane width

Fabric, aluminium and PVC vanes are all available in a variety of widths. Depending on the material and your personal preference, you can choose slat widths from 50 mm up to 250 mm.

A personal, playful and striking effect is created by choosing a combination of vanes in a vertical blind. For example, a plain material combined with a patterned fabric in the same colour.

Mono Operation

With only 1 control chain you can tilt and slide the vanes. This simple to use control is now offered as standard on Luxaflex® Vertical Blinds.

Sustainable materials

Sustainability was a key factor in the production of this collection. There is even a PVC-free material with 'Cradle to Cradle' certification which can be recycled and reused. A fabric with the Cradle to Cradle certification is a great endorsement for your interior!

Luxaflex® aluminium slats are made from 98% recycled aluminium. A choice for durability without compromising on quality.
