The next generation Roller Garage Door controller

# Why choose **somfy**®?

Your home is your castle. It needs to be safe, secure and easy to live in. And there are lots of things you can do to make your home even better.

Take your garage doors, for example. How many times have you struggled to open the doors whilst getting soaked in the rain? Not pleasant is it. With a roller garage door, you can stay inside your nice warm home and open your garage door with a remote control or wall switch.

**What makes the door operate so smoothly is a technologically advanced motor. And that's where we come in.**

## Home Motion technology for all around your home

RTS (Radio Technology Somfy) is what makes it all happen. And once you've stepped into the innovative new world of Home Motion you'll see just how much easier it can make your life. There's a whole range of Somfy® motors available to power roller shutters, awnings, window blinds, curtain tracks and roller garage doors. They can even help to make your home more secure.

Our thinking is different too. Our 'customer first' approach means that your guarantee, of up to 5 years, will be with your local installer, which makes things much easier for you.

We know you love your home and it's our aim to make you love it even more. Life with Somfy® and Rollixo is something we can all aspire to. If you'd like to find out more, look us up online at [www.somfy.co.uk](http://www.somfy.co.uk).

Best wishes, Neil Sorrell  
Key Account Manager

### Over 50 years of technical innovation

Somfy® International started life in 1960 in Cluses at the foot of Mont Blanc in France - a region known for producing precision instruments such as world renowned Swiss time pieces. With this tradition of quality craftsmanship and a clear vision of the future, Somfy has developed into the world leader in motors and control systems for the automatic movement of products around the home and workplace.

In the UK Somfy Ltd started in 1989 and has been at the forefront of home automation technology ever since.

### Here's how it works...

The brains behind the system is the Rollixo RTS controller. The controller fixes to your garage wall and is wired to the Somfy® motor, which then connects by plug or lead to your mains electric.

The Radio Technology Somfy® controller receives its instructions via radio waves from any of the Somfy® range.

Our system includes a Keygo key fob for you to take out and about with you.

It really is as simple as that.

## INTRODUCING THE Rollixo RTS

The next generation Roller Garage Door controller

When you choose the Rollixo RTS from Somfy® to power your roller garage door, you're choosing a product backed by decades of technical expertise and development.

We create home automation systems that are quick, easy and hassle-free to install and extremely easy to use.

5 REASONS TO  
MAKE SOMFY® YOUR  
FIRST CHOICE...

# SAFETY FIRST

Young children and family pets don't think about garage doors - why should they? But we care about keeping them safe when your roller garage doors are operating.

Our Rollixo RTS controller works with a device to stop the door rolling down if it detects someone in the way.

Our system stops the door operating if it comes into contact with any object. The system is very discreet and you'll almost forget it's there - until you need it.

SE transmitter

## SE Safety Edge

There are different safety edge solutions available so it's worth discussing with your garage door provider to find out the best CE compliant option to suit you.

## QUALITY WITHOUT QUESTION

When it comes to your home, quality matters. Our Rollixo RTS roller garage door control system is backed by unrivalled expertise and over 50 years of being at the forefront of home automation technology.

There are over 10 million of our RTS systems installed world-wide – so you know you're in safe hands.

The security of your home and garage is one of the things that matters most to you. So would you really be happy to hand over something so crucial to an inferior imitation? Neither would we.

We can't stress it often enough – quality counts when it comes to home automation technology. Top quality parts and installation ensures that your Rollixo RTS controller works smoothly and efficiently day after day, year after year.

# 03

## YOU CAN RELY ON SOMFY®

So sure are we that our Rollixo RTS system is the best in its field (or garage!) that we offer a 5-year warranty on Somfy® products from a certified dealer or assembler. All Somfy products comply with European safety standards and our comprehensive testing process ensures that our products stand up to several thousand cycles of use and in extreme environments.

In the unlikely event that something should go wrong, a light on the easy to use panel of the controller will immediately indicate the issue. Just call your garage door provider to let him know and he can immediately advise you. To back up our commitment to quality and customer service, Somfy has a team of technicians readily available to visit and support your garage door provider, giving him and you complete confidence.

# 04

## KEEPING YOUR GARAGE SECURE

With no visible locks or door handles, roller garage doors are very secure. Peace of mind is important, to you and to us, so we have an alarm that can be installed with your roller garage door. The alarm will sound if there is any attempt to open the door manually. Have a chat with your garage door provider to find out more.

# 05

## LIVING WITH ROLLIXO

As soon as your automatic roller garage door is installed you'll wonder how you managed before. Never again will you have to stand around in the dark or the rain trying to open the garage doors. In fact you won't have to leave your car or your home to open them - a quick click of the remote control will do the job for you.

RTS (Radio Technology Somfy) isn't just limited to operating your roller garage door. Window blinds at hard to reach windows, curtains that sweep elegantly together, clever home access solutions and even home cinema projectors and screens that appear almost out of nowhere - it's all down to RTS (Radio Technology Somfy). And all of these can be operated with the same remote control that you use for your roller garage door.

Radio Technology Somfy

It's co-ordinated home automation at its best.

# WHAT ELSE DO I NEED?

When you're on the go, you need a Keygo. This neat little four channel remote control attaches to your key ring and allows you to open and close your garage door or any other RTS product as you approach or leave. Great news when it's raining or it's dark.

Keygo may be small but it's big on security. Your Keygo will create a unique control code, so that there's no possibility of criminal 'code grabbing'.

Keygo fob

## OPTIONAL ACCESSORIES

### Metal Keypad RTS

Tap in a code to this anti-vandal keypad on the garage wall and the doors operate automatically.

### Lighting Receiver RTS

The radio signal switches on your lights remotely. A great feature whether it's for safety, to turn on your garage lights, or to light up your home or garden.

# TAKE CONTROL

Our range of remote controls operate within a 50m range, even through concrete walls so you can operate your roller garage doors from the comfort of your home.

### Telis 1 RTS

Single channel radio handset to control your roller garage door.

### Telis 4 RTS

Multi-channel radio handset to control your roller garage door plus other items such as electric blinds or electric awnings.

### Telis 16 RTS

Multi-channel radio handset with LCD screen to control your roller garage door plus other items such as electric blinds or electric awnings.

Smooove wall switch

# OFF THE WALL

Or, in Smooove's case, attached to the wall, quickly and easily and very cleanly. Our Smooove wall switches can be fitted to the wall in your garage or hallway and uses touch sensitive technology. Smooove communicates with the Rollixo controller by RTS technology (radio waves) so there's no need for wires and therefore, no need to redecorate.

Just the lightest of touches is all that's needed to operate Smooove wall switches. As soon as you touch the face of the unit you'll see a small red light flick on and a discreet beep will sound, giving you instant feedback.

The Smooove central modules are available in four different finishes...

## HOME MOTION ALL AROUND YOUR HOME

RTS (Radio Technology Somfy) is the brains behind Somfy® home automation. RTS works with channels so a one-channel remote control will operate one item, say, your roller garage door. Later on, you may want to consider other home motion innovations and this is where RTS really comes into its own.

Window blinds, full length curtains, even home cinema screens and awnings can all be operated with a Somfy® motor. What you don't want is a jumble of handsets. Somfy has a range of multi-channel remote controls that operate more than one item. So, from your comfy spot on the sofa, you can operate your garage door, lighting, electric window blinds (either separately or all together) and your motorised curtains too.

In 2012 alone, 100 million Somfy motors were sold worldwide. Somfy's reputation is second to none because it produces a broad range of motors for use all around the home that are safe and incredibly reliable, thanks to their rigorous testing programme. The motors are designed to fit inside a product such as a window blind or roller garage door so they don't interfere with the décor and are backed by a guarantee of up to 5 years. Isn't that good to know?
